Dear Hiring Manager,

Fullstack Engineer

I have previously been a paid volunteer **Programme Assistant** at Andela, working closely with program managers to run tech programs on the African developer ecosystem.

My community experiences have groomed me in certain soft skills like collaboration, feedback, and attention to detail.

I am the right fit because I am a very good collaborator and I have the soft skills and talent needed to excel in my new role.

I also have experiences in other fields besides from tech, fusing all my experiences together will produce a formidable personality which will be beneficial to your team.

I am gifted in building web apps and I am also poised with a good eye for a nice design.

Kindly take out time to have a look at my [Portfolio](#) and [Resume](#) as I believe I will be an asset to your team, thank you for your time.

Sincerely,

Akinsiku Oluwafemi David
